

SANDVIK QI353 MOBILE HSI CRUSHER

TECHNICAL SPECIFICATION

The QI353 is the most versatile, mid-sized mobile impactor available today, we have developed the QI353 to deliver more for our customers. It's based upon a new modular track platform and features Sandvik's market leading Prisec technology, capable of operating in primary and secondary applications.

KEY BENEFITS

Reliability

- Market leading Sandvik Prisec impact chamber for unrivalled flexibility and performance
- Rock box and underpan feeder featuring wear resistant liners for extended wear life
- Premium components selected throughout and FEA analysis on structural parts for durability
- Steel pipe work used extensively to give superior heat dissipation and maximum reliability
- Capable of operating in the most hostile environments

Productivity

- Load sensing system for feeder drive ensures continuous crushing
- Pre-screen with choice of media for effective removal of fines, maximizing throughput and reducing wear
- Largest feed opening in its class, resulting in fewer reduced blockages and higher uptime
- Adjustable apron curtains and tip speed enable a wide range of end product gradations to be achieved
- Selection of hammers to suit a wide range of applications
- NEW automation system featuring Optik™ intuitive user experience to maximize uptime and boost output
- Prepared for modular hanging screen as standard to provide a 1, 2 or 3 way split (see HS323 specification)
- 15 % larger fuel storage to maximize intervals between refueling
- Connected to Sandvik My Fleet with 7 year data subscription. Benefits include 24/7 fleet management, geo-fencing and remote operator support

Cost of ownership

- Latest generation fuel efficient powerpack provides maximum performance and cost efficiency
- Fluid clutch drive for smoother power transmission for optimum fuel efficiency and maximum power transfer
- Requires 40 % less hydraulic oil per service and extended hydraulic oil replacement intervals, overall up to 64 % less hydraulic oil consumed over 10,000 hrs of machine usage* (subject to oil sampling)

Safety

- Patented rotor locking and positioning device for quick and safe maintenance
- Unique 4 key trapped system to ensure safe inspection after the rotor has stopped turning
- Includes integrated lifting jib, chain hoist and lifting cradle for safe removal, rotation and fitment of hammers
- Mandatory audible and visual warnings for safe operation whilst tracking and start-up / shut down
- Emergency stop buttons and conveyor pull stop cords around the plant for easy access during operation
 Wireless radio handset and proportional speed control for safe tracking onsite
- Spacious platforms provide safe access for service and maintenance

Sustainability

- Double-deck pre-screen maximizes crusher throughput, reduces wear costs and energy consumption
- Largest rotor diameter in its class reducing energy consumption
- Latest generation powerpack for reduced emissions and optimum fuel economy
- Dust suppression spray bars and onboard water pump to minimize dust reducing environmental impact
- Extended service intervals and less oil consumption, up to 64% less as highlighted above *, results in a more sustainable operation
